

FULL DAY TOUR TO NATIONAL PARK PLITVICE

Plitvice Lakes

Plitvice Lakes are one of Europe's most spectacular natural wonders and a pleasure to visit at any time of year. This wonderful natural phenomenon consists of 16 interconnected lakes - all situated at a different level - and over 90 waterfalls of different sizes. The colour of the water is changing from emerald green to aqua blue and it's so clear that you can easily see through, almost better than in any aquarium. Our guide will make sure you see as much as you can so you can just relax and enjoy the surroundings. Just like with any other wonders of nature, you have to visit and make your own impression.

Included in price:

Transfer in A/C vehicle (car, van, minibus)
